**NUMBER 1**  
*SPECIAL ISSUE*  
**SPACE SUIT AND EVA**  
**DESIGN, PROTOCOLS, AND SAFETY**

*A Selection of Papers Presented at the  
9th IAA Man-in-Space Symposium, Cologne, Germany, 17-21 June 1991*

<b>Introduction</b>		ix
<b>PART 1: INVITED LECTURE</b>		
<b>EVA design: lessons learned</b>	Jerry L. Ross	1
<b>PART 2: SPACE SUITS AND EVA</b>		
<b>Past, present, and future: the U.S. EVA Program</b>	James W. McBarron II	5
<b>Design to safety: experience and plans of the Russian space suit programme</b>	Guy I. Severin	15
<b>The EVA space suit development in Europe</b>	A. Ingemar Skoog	25
<b>An assessment of habitat pressure, oxygen fraction, and EVA suit design for space operations</b>	George W. Morgenthaler, Dale A. Fester and Carolyn G. Cooley	39
<b>Suited crewmember productivity</b>	A. S. Barer and S. N. Filipenkov	51
<b>EVA safety design guidelines</b>	Paul Tremblay	59
<b>PART 3: WORKSHOP ON EVA SAFETY: PREBREATHE VS R-FACTOR</b>		
<b>Workshop Panel</b>		69
<b>Introduction and overview of the problem</b>	Keith Hudkins	71
<b>Decompression safety of EVA: Soviet protocol</b>	Arnold S. Barer and Sergei Filipenkov	73
<b>U.S. prebreathe protocol</b>	James W. McBarron II	75
<b>EVA: European plans</b>	J. Wenzel, K. E. Klein and L. Vogt	79

## NUMBER 2

<b>Control of omni-directional rendezvous trajectories</b>	Yu Shaohua, Ryojiro Akiba and Hiroki Matsuo	83
<b>Optimal atmospheric trajectory for aero-gravity assist</b>	F. A. Lohar, D. Mateescu and A. K. Misra	89
<b>Proof-mass actuator control of Shuttle-based astromast</b>	C. L. Kirk and M. S. Lee	97
<b>Circular macroparticle accelerator: impact fusion propulsion</b>	F. Winterberg	107
<b>Response of a solidly rotating amphora-type liquid column to axial excitation</b>	Helmut F. Bauer and Werner Eidel	113
<b>Droplet vaporization in subcritical and supercritical environments; high vs low pressure modelling</b>	Hang Jia and George Gogos	121
<b>Synthesis of ethological studies on behavioural adaptation of the astronaut to space flight conditions</b>	Carole Tafforin	131
 <i>ACADEMY TRANSACTIONS NOTES</i>		
<b>Space activities and global popular music culture</b>	Allison Rae Wessels and Patrick Collins	143
<b>Quantified EEG in different <i>G</i> situations</b>	K. de Metz, O. Quadens and M. De Graeve	151
 <i>EX MUNDO ASTRONAUTICO</i>		
<b>In Memoriam—György Barta</b>	Iván Almár	159

## NUMBER 3

<b>How to improve the orbit of Doppler tracked satellites</b>	Erick Lansard	161
<b>New kinematic relations for the large angle problem in rigid body attitude dynamics</b>	P. Tsiotras and J. M. Longuski	181
<b>Response of a rotating anchored finite annular liquid layer to axial excitation</b>	Helmut F. Bauer	191
<b>Dynamic characteristics of the partially filled rotating dewar of the Gravity Probe-B Spacecraft</b>	R. J. Hung, C. C. Lee and F. W. Leslie	199
<b>Nonlinear rotational maneuver and vibration damping of NASA SCOLE system</b>	Misbahul Azam, Sahjendra N. Singh, Ashok Iyer and Y. P. Kakad	211

**Space Station Freedom: an overview**

Richard H. Kohrs and Earle K. Huckins III 221

**Cost estimates for lunar products and their respective commercial prices**

H. H. Koelle and B. Jochenning 227

**ACADEMY TRANSACTIONS NOTE**

**Pierre Contensou (1914–1987) and the optimization theory and applications**

J.-P. Marec 239

**NUMBER 4**

**Time-free transfers between libration-point orbits in the elliptic restricted problem**

K. C. Howell and L. A. Hiday-Johnston 245

**Dynamics and control of a flexible tethered system with offset**

V. J. Modi and R. P. Pidgeon 255

**Phase plane analysis of the solar array stepping dynamics and alternative slewing strategy**

P. S. Goel, P. K. Maharana and M. N. Sathyanarayana 267

**Augmentation of low power hydrazine thrusters**

Ilan Hadar and Alon Gany 275

**“Black Betsy”: the 6000C-4 rocket engine, 1945–1989. Part I**

Frank H. Winter 283

**“Black Betsy”: the 6000C-4 rocket engine, 1945–1989. Part II**

Frank H. Winter 305

**Psychomotor performance during a 28 day head-down tilt with and without lower body negative pressure**

A. Pavy-le Traon, A. Rous de Feneyrols, A. Cornac, R. Abdeseelam, D. N'uygen, M. Lazerges, A. Güell and A. Bes 319

**NUMBER 5**

**Generalized canonical systems—I. General properties**

Sandro Da Silva Fernandes 331

**Generalized canonical systems—II. Derivation of Lagrange's and Gauss' equations**

Sandro Da Silva Fernandes 339

**Generalized canonical systems—III. Space dynamics applications: solution of the coast-arc problem**

Sandro Da Silva Fernandes 347

**Tethered system attitude control after attachment point blocking**

Michele Grassi, Antonio Moccia and Sergio Vetrella 355

**Satellite navigation for meteorological purposes: inverse referencing for NOAA-N and ERS-1 imagers with a 1 km nadir pixel size**

J. Klokočník, J. Kostecký, H. Grassl, P. Schlüssel, L. Pospíšilová, R. H. Gooding  
and P. Lála 363

**Plasma thruster development program at the IRS**

Monika Auweter-Kurtz 377

**Fluid electrolyte excretion during different hypokinetic body positions of trained subjects**

Yan G. Zorbas, Konstantin A. Naexu and Youri F. Federenko 393

*ACADEMY TRANSACTIONS NOTES*

**Nearly-uniform deployment strategy for space tether systems**

E. M. Levin 399

**Nonlinear oscillations of space tethers**

E. M. Levin 405

**ASTROSAIL and SETISAIL: two extrasolar system missions to the Sun's gravitational focuses**

Jean Heidmann and Claudio Maccone 409

**NUMBER 6**

**Aero-assisted trajectories for direct launch systems**

Colin R. McInnes 411

**On the non-linear dynamics of a space platform based mobile flexible manipulator**

V. J. Modi, H. W. Mah and A. K. Misra 419

**Gyroscopic stability of a non-rigid spacecraft**

A. C. Or 441

**Leisure time activities in space: a survey of astronauts and cosmonauts**

Alan D. Kelly and Nick Kanas 451

*ACADEMY TRANSACTIONS NOTES*

**Nuclear rocket propulsion principle**

F. Winterberg 459

**Theoretical distributions of vegetation indices and their approximation by normal distributions**

Tony K. Yanev 463

**Saha crater: a candidate for a SETI lunar base**

Jean Heidmann 471

**Harakiri in space**

Harry O. Ruppe 473

## NUMBER 7/8

### *SPECIAL ISSUE*

#### **INTERNATIONAL ASTRONAUTICAL FEDERATION THE FIRST FOUR DECADES**

<b>Preface</b>	Frederick I. Ordway III	ix
<b>Foreword</b>	F. C. Durant III	xi
<b>Message from the IAF President</b>	A. Azcárraga	xv
<b>Prelude and first decade, 1951-1961</b>	L. R. Shepherd	475
<b>Blossoming of the space age, 1961-1971</b>	W. H. Pickering	501
<b>A decade of consolidation, 1971-1981</b>	A. L. Jaumotte	509
<b>Reassessment and expansion, 1981-1991</b>	J. Grey	515
<b>Recollections of events, actions and other developments in the growth of the IAF from 1981 to 1990</b>	J. J. Harford	519
<b>Development of the IAF Constitution</b>	Vladimir Kopal	521
<b>Structure of the International Astronautical Federation</b>	Michelle Claudin	533
<b>Relations with international organizations</b>	Luboš Perek	535
<b>The IAF in review, 1951-1991</b>	Robert Mory	539

## NUMBER 9

<b>Closed-loop vibration control of flexible space shuttle manipulator</b>	C. L. Kirk and F. L. Doengi	561
<b>Effect of multi-layer thermal insulation thickness and location on the hypervelocity impact response of dual-wall structures</b>	William P. Schonberg	577
<b>U.S. Space Station Freedom propulsion system operations</b>	R. F. Overmyer and B. A. Winters	591

**Operational use of environmental satellite remote sensing and satellite communications technology for global food security and locust control by FAO: The ARTEMIS and DIANA systems**

J. U. Hielkema and F. L. Snijders 603

**The design of lunar and Mars transportation systems utilizing extra-terrestrial resources**

R. M. Zubrin 617

**A low cost commercial approach to space systems development and operations**

T. F. Bonner, M. A. Faget, J. P. Allen and D. H. Langstaff 629

*ACADEMY TRANSACTIONS NOTES*

**A critical review on the viability of a space propulsion based on the solar wind momentum flux**

Giovanni Vulpetti 641

**Synthetic estimation of development cost of satellite**

Zhu Yilin 645

**Life-span of irradiated mammals. Mathematical modelling**

E. E. Kovalev and O. A. Smirnova 649

## NUMBER 10

### *SPECIAL ISSUE*

## SMALL SATELLITES AT THE WORLD SPACE CONGRESS 1992

**Preface**

Pierre Molette and Arnolfo Valenzuela xi

**Small satellites at The Johns Hopkins Applied Physics Laboratory**

John Dassoulas 653

**Management of small satellite programs—lessons learned**

Rick Fleeter 667

**The Brazilian scientific satellite**

J. H. A. Sobral, P. Muralikrishna, M. A. Abdu, W. D. Gonzalez-Alarcon, O. Pinto Jr,  
B. R. Clemesha, H. Takahashi, N. B. Trivedi, U. B. Jayanti, V. W. J. H. Kirchhoff,  
C. J. Zamlutti, O. P. Dias Jr and D. C. Ceballos 675

**SAC-B small scientific satellite**

Marcos E. Machado, Mario Acuña, Jerre B. Hartman and Mario Gulich 683

**The scientific project of the small satellite of China**

Wen-Rui Hu and Heng Du 687

**Micro scientific spacecraft in Japan**

T. Hayashi, H. Saito, T. Orii and Y. Masumoto 693

**INEO—imaging of near-Earth objects**

H. Iglseder, W. Arens-Fischer, H. U. Keller, G. Arnold, R. Callies, M. Fick,  
K. H. Glaßmeier, H. Hirsch, H. J. Rath, M. Hoffmann, E. Kührt, E. Lorenz,  
N. Thomas and R. Wäsch 697

**Microinstruments and microsensors for space science**

G. Varsi, M. Chrisp, R. Jones, T. Van Zandt, T. Kenny, W. Kaiser, W. Banerdt,  
E. Hui and D. Crisp 705

**NUMBER 11**

***SPECIAL ISSUE***

**RADITION EFFECTS AND DOSIMETRY  
AND PROTECTION GUIDELINES**

**Preface**

xi

**Space radiation dosimetry**

G. Reitz 715

**Rapid assessment of radiobiological doses for terrestrial and interplanetary space missions**

G. Melkonian and J. Bourrieau 721

**Cosmic dosimetry using TLD aboard spacecrafts of the "Cosmos" series**

K. Hübner, P. Schmidt and J. Fellingner 731

**Radiation protection guidelines for space activities**

R. J. Michael Fry 735

**Risks of radiation cataracts from interplanetary space missions**

J. T. Lett, A. C. Lee and A. B. Cox 739

**HZE particle effects in space**

Gerda Horneck 749

**Effects of sublethal irradiation with helium ions (300 MeV/nucleon) on basic hematological parameters of mice**

M. Hofer, Š. Viklická, V. N. Gerasimenko and A. N. Kabachenko 757

**Recent results of the joint ESA-DARA/IBMP experiments biokosmos "seeds"**

A. R. Kranz, K. E. Gartenbach, V. V. Shevchenko, E. Schopper, B. Baican,  
J. U. Schott, R. Seltz, C. Heilmann, D. Dudkin, N. Nefedov and Y. Potapov 761

**NUMBER 12**

**Family of deployable/retractable structures for space application**

J. Unda, J. Weisz, J. Rivacoba, I. Ruiz Urien and R. S. Capitanio 767

<b>Test results of the air turbo ramjet for a future space plane</b>	
Nobuhiro Tanatsugu, Yoshihiro Naruo and Itaru Rokutanda	785
<b>Space Station Freedom ground systems program—a survey</b>	
A. Accola, G. Paules, J. Faulkner, G. Giampalmo and H. Kozawa	797
<b>Lunar oxygen: economic benefit for transportation systems and <i>in situ</i> production by fluorination</b>	
M. Reichert, S. Lingner and W. Seboldt	809
<b>Application of existing launch and flight system hardware for early SEI mission</b>	
W. H. Siegfried and J. M. Garvey	821
<b>Magnetobraking for Mars return vehicles</b>	
Geoffrey A. Landis	829
<b>Why rover preparatory programmes? The example of the French programme “VAP”</b>	
D. J. P. Moura, A. Baiget, F. X. Chaffaut and F. Rocard	835
<b>Diuretic as a means for rapid adaptation to weightlessness</b>	
V. B. Noskov and A. I. Grigoriev	841
<b>25-Year overview: safety and rescue symposia—have they made a difference?</b>	
Gloria W. Heath	845
<b>ACADEMY TRANSACTIONS NOTE</b>	
<b>Sky distribution of artificial sources in the galactic belt of advanced cosmic life</b>	
Jean Heidmann	855
<b>EX MUNDO ASTRONAUTICO</b>	
<b>In Memoriam—Konstantin Iosifovich Gringauz</b>	859
<b>In Memoriam—Vladimir Nikolaevich Brukhanov</b>	859
<b>In Memoriam—Vladimir Pavlovich Barmin</b>	859
